

VOUSSOIR

ARCHITECTURE • INTERIOR • DESIGN

BUILT ON BALANCE.
DEFINED BY INTENT.

THE IDEA BEHIND

VOUSSOIR

A voussoir is a wedge-shaped stone forming part of an arch. Each piece is shaped by its place within the whole gaining strength, meaning and purpose through its relationship with the others.

For us, Voussoir is more than a name. It is a way of thinking about architecture.

An arch does not derive its strength from a single stone, but from the precise relationship between many. In much the same way, we believe a space is born not from isolated elements, but from the dialogue between them — solid and void, light and shadow, material and texture, structure and movement. Every element has a role. Every proportion carries intention. Every transition shapes the experience of the whole.

A design practice creating considered spaces through form, material and detail.

Voussoir approaches each project as a dialogue between context, function and expression.

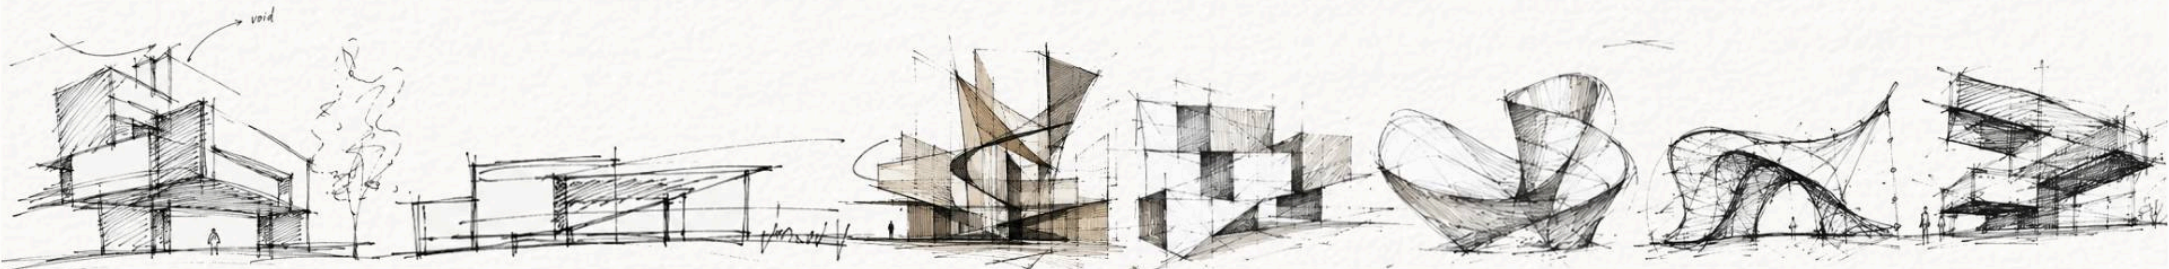

Working across architecture and interiors, we develop spaces that are carefully planned, materially rich and responsive to the way people experience them.

Our process moves from concept and spatial planning to materiality, detailing and execution, allowing every project to develop its own identity while remaining grounded in clarity and purpose.

We believe good design lies in the balance between what a space needs to do and how it makes you feel.

CREATING MEANING, CELEBRATING CONTEXT

FROM PARTS, A WHOLE.
FROM SPACE, AN EXPERIENCE.
FROM ARCHITECTURE, LIFE.

THE PRACTICE

"DESIGN BEGINS WITH LISTENING"

At Voussoir, we believe great architecture begins with understanding of place, people and purpose. We approach every project as a dialogue between context and intent, balancing creativity with responsibility.

From concept to completion, we bring together thoughtful design, careful planning and technical precision to create spaces that are purposeful, refined and enduring.

LET IT LIVE

OUR DESIGN APPROACH

01

CONTEXT

ROOTED IN PLACE

Understanding the site, climate, landscape, culture and context before defining a response.

PLACE • CLIMATE • LANDSCAPE • CULTURE

02

SPACE

COMPOSED THROUGH EXPERIENCE

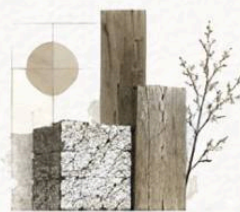

Creating clear spatial relationships, movement and moments that shape how a space is experienced.

PROPORTION • MOVEMENT • SEQUENCE • THRESHOLD

03

MATERIAL

MATERIAL WITH MEANING

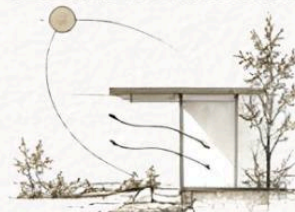

Using material, texture, colour and detail to establish character, atmosphere and longevity.

TEXTURE || TACTILITY || LIGHT || LONGEVITY

04

SUSTAINABILITY

DESIGNED WITH RESPONSIBILITY

Integrating climate response, resource efficiency and adaptable strategies from the beginning.

CLIMATE || RESOURCE || EFFICIENCY || ADAPTABILITY

05

EXPERIENCE

MADE ALIVE THROUGH INHABITION

Designing spaces that feel intuitive, comfortable and connected to the people who use them.

PEOPLE || LIGHT || MOVEMENT || MEMORY

FROM CONCEPT TO COMPLETION

COST

VALUE BY DESIGN

Thoughtful decisions that balance design intent with budget and long-term value.

TIME

PLANNED FOR DELIVERY

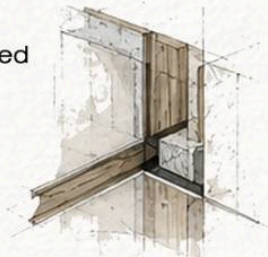

Clear planning, coordination and decision-making to keep projects moving efficiently.

QUALITY

DETAILS THAT ENDURE

Design intent carried through materials, workmanship, detailing and execution.

VOUSSOIR

SPACES THAT RESPOND, SPACES THAT ENDURE

THE DISCIPLINES

"A UNIFIED APPROACH. A DEEPER OUTCOME."

We work across scales and disciplines, bringing together planning, architecture, interiors, engineering and project delivery as one integrated process. From the larger forces of site and strategy to the finer language of material and detail, our approach is coordinated from concept to completion balancing design intent, technical precision, cost, time and quality.

THE PEOPLE BEHIND VOUSSOIR

THREE PERSPECTIVES • ONE CONTINUOUS PRACTICE

NANDINI SINGH FOUNDER & ARCHITECT

Nandini Singh approaches architecture with curiosity, seeking not only to understand how a space is made, but how it is felt, remembered and inhabited. Her sensibility is drawn to the quieter relationships within architecture: the way light settles across a surface, how material changes with time, how proportion guides movement, and how a threshold can transform the experience of a place.

Working across architecture and interiors, she moves between the larger architectural idea and the intimacy of detail. Her work seeks a balance between clarity and character, spaces that are contemporary without being transient, expressive without excess, and rooted in the circumstances that give them meaning.

As the Founder & Architect of Voussoir, she brings a fresh voice to a practice grounded in experience. Her role is to question, explore and shape, translating observations into a design language that is thoughtful, distinct and quietly confident.

At the heart of her approach is a belief that architecture is a conversation between place, material, people and time. The intention is not simply to create beautiful spaces, but spaces that gather meaning through the lives lived within them.

A curious eye. A quiet language. A lasting sense of place.

THE PEOPLE BEHIND VOUSSOIR

THREE PERSPECTIVES • ONE CONTINUOUS PRACTICE

RAVI N. SINGH

FOUNDING ADVISOR - DESIGN & SUSTAINIBILITY

With over 25 years of architectural practice, Ravi N. Singh is the backbone of Voussoir, bringing to the practice the depth of experience, technical understanding and practical knowledge built through decades of architectural work. His professional journey spans hospitality, commercial, residential, institutional, industrial, township, sports and large-scale developments, giving him a broad understanding of architecture across varied scales and complexities.

His strength lies in bridging the distance between an idea and its realisation. From architectural design and development to technical resolution, consultant coordination, project management and site execution, he brings a rigorous understanding of how architecture is resolved, coordinated and ultimately built.

At Voussoir, his experience provides the stability behind the creative vision, grounding ideas in practicality while protecting their architectural intent through every stage of the process. His approach is precise, hands-on and deeply connected to the realities of construction.

There is also a quiet continuity in his journey: Voussoir Architects, Interiors & Project Management was part of his professional practice as early as 2001-02, making the name itself a thread connecting his earlier work to the practice it has become today.

The experience behind the idea.
The precision behind the vision.
The backbone behind Voussoir.

THE PEOPLE BEHIND VOUSSOIR

THREE PERSPECTIVES • ONE CONTINUOUS PRACTICE

ISMITA SINGH

FOUNDING ADVISOR - DESIGN & SUSTAINIBILITY

With 25+ years of experience in architecture and design, Ismita Singh brings to Voussoir a perspective shaped by leadership, multidisciplinary practice and a deep understanding of how architecture responds to people, place and the environment. Her professional journey spans industrial, institutional, educational, commercial, hospitality, office and large-scale developments, giving her a broad understanding of architecture across diverse scales and contexts.

Her practice is grounded in architectural design, design development and studio leadership, with extensive experience in multidisciplinary coordination and green building certification through GRIHA and IGBC. She brings together design intent, environmental responsibility and technical understanding to create architecture that is thoughtful, responsive and enduring.

At Voussoir, her experience adds a measured and informed voice to the practice — balancing creative ambition with the responsibility of designing for people, performance and place. Her leadership and experience provide depth to the practice, while her understanding of sustainability strengthens its commitment to architecture that is conscious of its impact and built to endure.

Experience that informs.
Sustainability that responds.
Architecture that endures.

OUR VALUES

01

A SENSE OF PURPOSE

WE VALUE THE OPPORTUNITY TO CREATE.

Every project is an opportunity to contribute something meaningful. We approach our work with responsibility, curiosity and care, striving to create architecture that adds value to its place and the people who experience it.

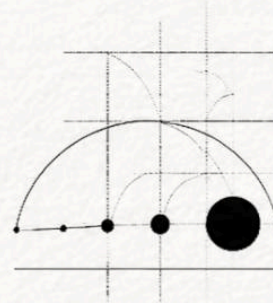

02

ALWAYS EVOLVING

CURIOSITY KEEPS US MOVING FORWARD.

We believe good work comes from a willingness to question, explore and improve. We remain open to new ideas, materials, technologies and ways of working, allowing each project to shape and strengthen the next.

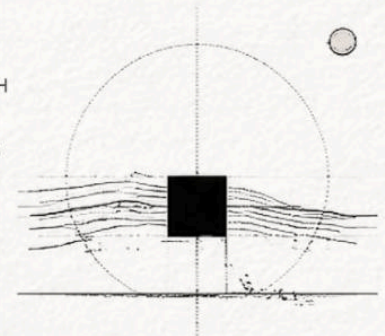

03

ROOTED IN CONTEXT

EVERY PROJECT BEGINS WITH WHERE IT BELONGS.

We take the time to understand the character of a place — its climate, landscape, culture, history and people. This understanding forms the foundation for architecture that responds naturally to its surroundings.

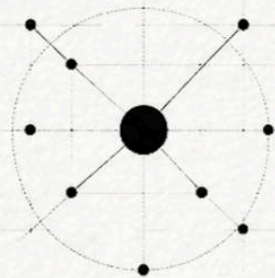

04

COLLECTIVE INTELLIGENCE

BETTER IDEAS EMERGE TOGETHER.

We believe the strongest work is built through collaboration. The exchange of ideas between clients, designers, consultants, craftsmen and collaborators brings different perspectives together and enriches the outcome.

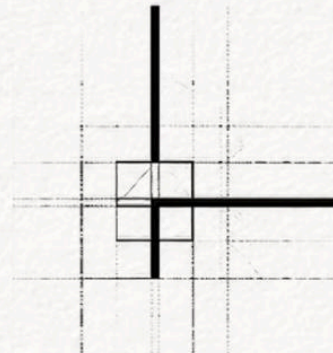

05

THE PURSUIT OF EXCELLENCE

WE KEEP LEARNING, QUESTIONING AND REFINING.

We believe excellence is found in the process as much as the outcome. Attention to detail, continuous learning and a commitment to improvement guide our work from the first idea through to its final expression.

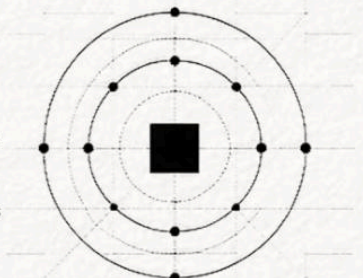

06

PEOPLE AT THE CENTRE

ARCHITECTURE IS ULTIMATELY EXPERIENCED BY PEOPLE.

We design with an understanding of how people live, work, gather and move through space. Our aim is to create environments that feel considered, intuitive and meaningful in everyday life.

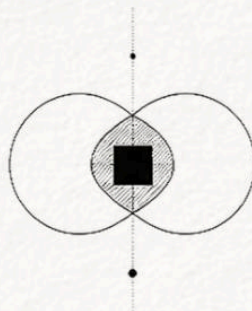

07

RELATIONSHIPS BUILT ON TRUST

GOOD WORK BEGINS WITH GOOD RELATIONSHIPS.

We value the trust placed in us by our clients, consultants, collaborators and partners. Clear communication, accountability and respect form the foundation of every relationship we build and every project we undertake.

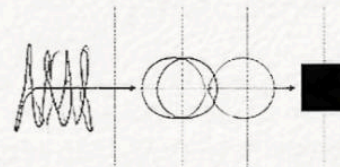

08

TRUST THE PROCESS

IDEAS BECOME STRONGER THROUGH DIALOGUE AND ITERATION.

We believe meaningful design develops through exploration, discussion and refinement. We allow ideas to be tested, challenged and resolved, creating clarity while staying true to the intent of the project.

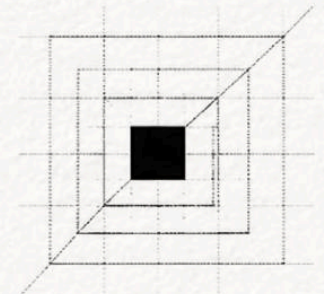

09

CARE IN WHAT WE CREATE

WE BELIEVE THE DIFFERENCE LIES IN HOW MUCH WE CARE.

Care extends from the larger idea to the smallest detail — from material and craftsmanship to performance and experience. We strive to create work that is thoughtful, enduring and worthy of the people and places it serves.
